Comfeel® Plus &
Comfeel® Plus Transparent

- Excellent support for closure of wounds
- Flexibility to wound and patient
- Free from animal products
Comfeel® Plus & Comfeel® Plus Transparent - Heals and seals moist wounds

Free from animal products
• Suitable for those who don’t use animal products for religious or ethical reasons

Change indicator and mapping grid
• Provides easy monitoring of the wound and eliminates unnecessary dressing changes

Unique bevelled edges
• Enhances patient comfort by reducing rucking

Superior exudate handling
• Reduces dressing change for the patient, therefore cost effective
• Contains alginate for absorption

Low-friction, smooth film backing
• Reduces shearing that can cause the dressing to catch on clothing and bed linen

Soft and flexible
• Adapts to the shape of the wound and body

Easy application and handling
• The waterproof, transparent top film allows the patient to shower and maintain their everyday life

Excellent support for closure of wounds
• Prevents the newly formed, fragile skin from breaking down again

What type of wounds would I use Comfeel Plus & Comfeel Plus Transparent on?

Indications
• Exuding pressure ulcers, leg ulcers, superficial burns, superficial partial-thickness burns, donor sites, postoperative wounds and skin abrasions
• Use also as protection on epithelialised tissue or as a secondary dressing
• Recommended wear time up to 7 days dependent on exudate levels
