# MINUET® 2

Community bed range

#### All beds

- Low height 230mm (9")
- Designed for use in private, residential and convalescent homes
- Integrated mattress platform extension of 1300mm
- Optional Trendelenberg/Reverse Trendelenberg tilt
- Safe Working Load 180kg
- Disassemble into four parts for installation access
- Compact storage/transportation using transit brackets
- Compatible with a range of pressure-reducing and pressure relieving mattresses

#### Two section bed

- Electric backrest and height adjustment
- Retracting, rising backrest for reduced pressure, shear and friction

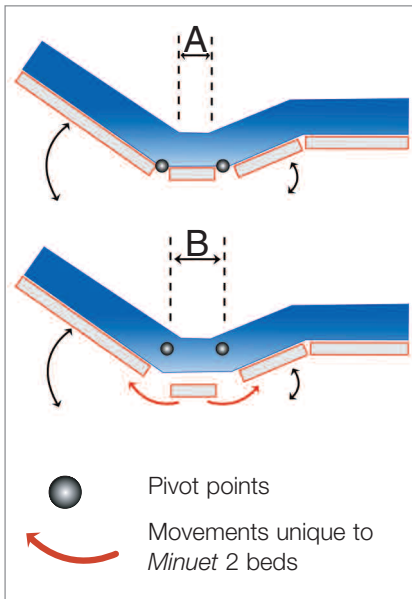

#### Four section bed

- Electric backrest, knee-break and height adjustment
- Pro-Contour® Advance profiling for reduced pressure, shear and friction

# FEATURES AND BENEFITS

## Pro-Contour advance profiling

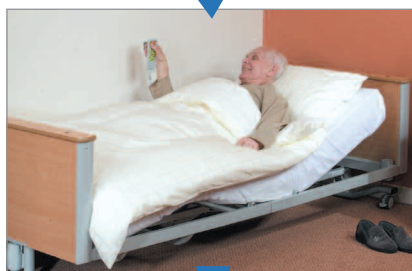

Compared to a conventional profiling bed (A), the Pro-Contour Advance Profiling on the four-section Minuet 2 beds raises the pivot point of the backrest and thigh section closer to the client's natural pivot point (their hip joint) (B). It mimics the way a person's tissues stretch as they move from lying to sitting and reduces compression on the mattress surface at the seat section.

This offers major benefits over conventional profiling beds:

- Enhanced pressure, shear and friction reduction
- Excellent postural support
- Exceptional comfort

## Effortless upright positioning

## Intelligent profiling system

To prevent the client from sliding down the bed, on descent the knee-break stays raised until the backrest is at the same angle (1).

Both the backrest and knee-break then descend together until they reach a flat position simultaneously (2).

This is unique – on other beds the knee-break descends regardless of backrest angle, which can result in the client sliding down the bed.

The intelligent profiling system maximises comfort, improves postural support and helps to reduce pressure, shear and friction. This can help to reduce the risk of pressure ulcers.

It also reduces moving and handling risks for the carer as the client is less likely to slide down the bed.

## Easy to clean

Slatted mattress platform

All areas easily accessible

Removable head and foot panels

### Low height 230mm (9") for enhanced safety

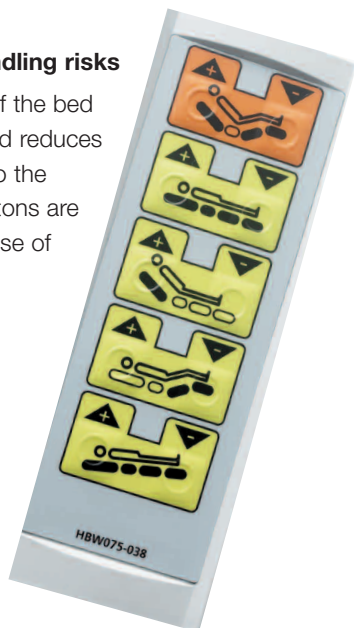

The exceptional low height of the Minuet 2 beds offers major benefits:

- **Easier client transfers** – the low height allows the smallest of clients to transfer safely, and also enables downward transfer onto the bed from wheelchairs, chairs etc.
- **Enhanced safety** – for clients who are at risk of falling out of bed and the use of safety sides is not appropriate, the bed can be left at its lowest height.

### Reduced moving and handling risks

The fully electric operation of the bed aids client independence and reduces moving and handling risks to the carer. All of the handset buttons are raised and embossed for ease of location and use.

### Integral bed extension

To cater for taller clients, all the beds have an integrated mattress platform extension of 130mm. This is easily engaged and offers maximum flexibility. Full profiling of the calf section is achieved even when the bed is extended, enhancing comfort for the client.

### The *Minuet 2* bed range – key features and benefits

Feature	Benefits
Low height 230mm (9")	Enhanced client safety, easier client transfers
Disassemble into four sections	Easy storage, transport and assembly
Compatible with a range of mattresses	Wide range of pressure reducing and pressure relieving systems available
Integral bed extension with mattress retainer	Safely caters for taller clients
Safe working load 180kg	Safely caters for heavier clients
Optional battery back-up	Allows movement of bed in absence of mains power
Different finishes available	Blend with different décor styles

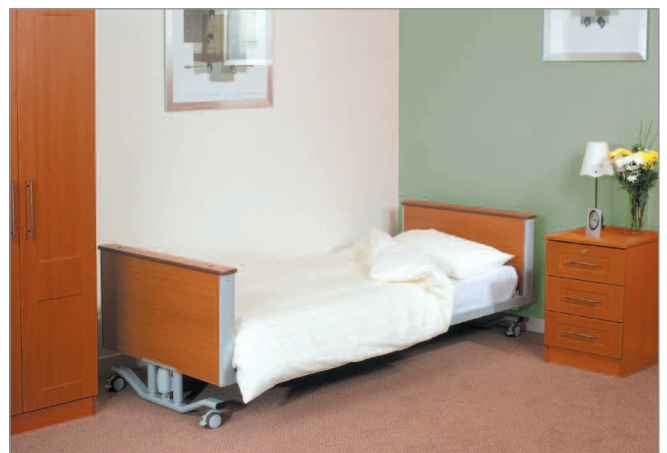

**Easy storage, transport and assembly**

**Beech effect finish**

**Cherry effect finish**
