You have challenges. We have solutions. The Philips IntelliVue MP5SC with IntelliVue Guardian Early Warning Score (EWS) is a flexible multi-patient spot-check device that goes far beyond the capabilities of traditional spot-check monitors. It helps enhance patient care by providing sought-after measurements and Clinical Decision Support, while aiding caregivers on the general floor in the early recognition of patient deterioration. This innovative, informative, and multi-purpose monitoring solution offers SpO₂, NBP, SureTemp, and Microstream CO₂. The IntelliVue MP5SC has the versatility to be used in continuous mode for reliable longer-term bedside monitoring, and its optional EWS Escalation Package allows the MP5SC to convert to a full ECG monitor via a patient-worn device when enhanced monitoring is required, such as during a code event.

Key advantages

- IntelliVue Guardian EWS enables early recognition of deteriorating patient condition to prevent treatment delays
- Large and bright 8.4” touchscreen with flexible parameter configurations to enhance patient care
- IntelliVue user interface optimized for ease of use on the general floor

More in touch with patients

Philips IntelliVue MP5SC spot-check patient monitor with IntelliVue Guardian Early Warning Score

The general floor is evolving: Patients require higher-acuity monitoring, and time constraints on nursing staffs are greater than ever. Based on the easy-to-use, industry-leading IntelliVue platform and offering many advantages not found with other solutions, the MP5SC is designed to help you enhance care on the general floor. The MP5SC goes beyond traditional spot-check monitoring by including proven IntelliVue measurements, innovative Clinical Decision Support tools, and an intuitive user interface tailored specifically to spot-check environments. Easy to use, the MP5SC helps caregivers on the general ward to simply measure, evaluate, and document their patient’s vital signs and EWS scores.

**Choice of SureTemp or Microstream CO₂.**

**Choice of Philips FAST or Nellcor OxiMax SpO₂ technology.**

8.4” (21.3cm) touchscreen color SVGA display with up to 3 waveforms for easy information input and intuitive onscreen navigation.

The MP5SC uses the same accessories as the rest of the IntelliVue family, facilitating training, ordering, and use throughout your facility.

**Barcode scanner support** for fast and accurate patient ID entry at the point of care.

**Up to four hours of battery operation** with standard lithium ion battery.¹

**Standard IntelliVue Guardian EWS Clinical Decision Support** with optional IntelliVue Guardian EWS Escalation Package for patient-worn device-based wireless ECG monitoring.

**Comfortable handle and bedrail mount** for transport.

¹. With basic monitoring configuration (automatic brightness reduction, RESP and SpO₂ measurements in use, NBP every 15 minutes).
“The MP5SC is a new generation monitor that presents data in a way that helps nurses and doctors at the bedside identify patients at risk. By calculating an early warning score and providing pictorial clues to the need to respond, it transforms monitoring to a combination of detection and advice. In my opinion such advisory monitoring is the future of ward monitoring.”

Dr. Rinaldo Bellomo, MBBS, MD, FRACP
PG Dip Echo Director of Intensive Care Research, Staff Specialist in Intensive Care Department of Intensive Care
Austin Hospital, Heidelberg, Vic. 3084 Australia

World-class IntelliVue measurement accuracy and trending capability.

Hospitals have the unique ability to take an existing escalation protocol and automate it in a spot-check monitor.

Provides best-in-class measurements, superb ease of use, and innovative Clinical Decision Support to improve workflow and patient care in a variety of care settings.

The MP5SC with IntelliVue Guardian EWS helps caregivers on the general floor take vital signs and calculate Early Warning Scores faster.
Vigilant monitoring on the general floor

**Supports your escalation protocol**

The MP5SC with IntelliVue Guardian EWS aids your hospital’s escalation protocol system by enabling quicker activation and intervention of the escalation team, compared to current practice. Because it’s fully configurable, the MP5SC with IntelliVue Guardian EWS helps hospitals to standardize calling criteria to meet their specific patient population needs and supports caregivers to improve understanding of and compliance with the escalation team program.

Once the escalation team has arrived, the monitor can provide full ECG monitoring. An optional EWS Escalation Package uses short-range radio-based ECG monitoring via a patient-worn device for instant ECG monitoring, including Clinical Decision Support, to save valuable time for the escalation team and enhance patient care.

Optional IntelliVue Guardian EWS Escalation Package enables single-patient continuous ECG monitoring with full arrhythmia and ST Map Clinical Decision Support.
